

CONSTRUCTION COMPANY PREFABRICATED PARTS COUNT

Case Study: Industrial – Construction Company

A construction company needed an inventory company with **experience in an industrial environment** to count prefabricated parts

CONSTRUCTION COMPANY PREFABRICATED PARTS COUNT

Case Study: Industrial – Construction Company

A construction company that has an affiliated factory of prefabricated parts and employs over 180 members of staff, required the support of RGIS. An essential component of the service range is tank construction, an area that has 25 years of success. The pre-stressed concrete tanks are well-known and the product stands for reliability, security with the maximum quality and are supported by a high level of customer satisfaction.

REQUIREMENT

The construction company needed an inventory company with **experience in an industrial environment to count prefabricated parts**, so required RGIS to provide the following:

- Provide **recommendations** on existing internal process
- **Support** the internal team
- **Validate quantity** of items counted
- **Experienced auditors** that were familiar within an industrial environment
- **All inventory to be counted** within the plant, including all store rooms and inventory outside

SOLUTION

The construction company partnered with RGIS to complete the **industrial inventory project**, and RGIS provided the following:

- Scheduled a team consisting of 15 customer employees which were supervised by an **experienced RGIS supervisor** for one day
- **Counted all inventory in all locations** both inside and outside the plant
- **Checked variances** between the system and the inventory counted
- **Presented recommendations** on existing internal process

RESULTS

The construction company found by outsourcing the **industrial inventory project** to RGIS the following results were achieved:

- All items were **accurately counted** in all locations including outside
- Recommendations made during the inventory count that **improved quality and saved time**
- Inventory count was **completed in one day**
- Saved **50% on costs** from identified inventory, along with the speed and accuracy of the inventory count

By partnering with RGIS, the construction company **achieved savings of 50% on costs** from identified inventory, along with the benefit of speed and accuracy from the inventory count
