

# PHARMACY DISTRIBUTION CENTERS WALL TO WALL INVENTORY COUNTS

**Case Study:** Warehouse – Pharmacy Chain

A large pharmacy chain needed an **accurate inventory count of two distribution centers** in preparation of opening a third distribution center

# PHARMACY DISTRIBUTION CENTERS WALL TO WALL INVENTORY COUNTS

## Case Study: Warehouse – Pharmacy Chain

One of the largest pharmacy chains in Brazil, with 432 stores and a presence in 12 states with more than 7,000 employees required the support of RGIS. The pharmacy chain has two distribution centers in the cities of Benevides and Aquiraz, and is opening another distribution centre in the city of Guarulhos, offering health and beauty products through stores and online.

### REQUIREMENT

The large pharmacy chain needed an **accurate inventory count of two distribution centers**, in preparation of opening a third distribution center, so required RGIS to provide the following:

- **Complete inventory counts** of two distribution centers in Benevides and Aquiraz
- **Experience** within a distribution center environment
- Counts to be completed over a **short time frame**
- **Accuracy** to be a priority

### SOLUTION

The large pharmacy chain partnered with RGIS to complete the **retail pharmacy inventory count of two distribution centers**, and provided the following:

Benevides:

- Scheduled an **experienced team of 68 RGIS auditors**
- Counted **6 million** items

Aquiraz:

- Scheduled an **experienced team of 74 RGIS auditors**
- Counted **5.4 million** items

### RESULTS

The large pharmacy chain found that by outsourcing the **retail pharmacy inventory count of two distribution centers** to RGIS, the following results were achieved:

- Above **99% accuracy** for counts of both distribution centers
- Counts **completed in two days**
- Total of **11.4 million items accurately counted**

By partnering with RGIS, the large pharmacy chain had both distribution centers with **11.4 million items counted with 99% accuracy within two days**
